GitHub is looking for interns to work with our Application Engineering team during the Summer of 2016! You'll work with our team of engineers to build and maintain features that ensure our site is fast, available, and meets the needs of our more than ten million users. We take pride in openness, collaboration, good coding practices, and workflow automation. During your internship, you will be working with team members in person at our San Francisco office as well as remote members from across the globe.

RESPONSIBILITIES:

- Writing and reviewing application code as part of GitHub.com application, products, and internal tools
- Documenting the code you write
- Working with support to triage and debug technical support requests

WE’D LOVE TO TALK TO YOU IF THE FOLLOWING SOUNDS LIKE YOU:

- You are a self-driven, goal-oriented student with a passion for learning
- You are enthusiastic and imaginative about building outstanding tooling for developers
- You have interest in Open Source with a track record of Open Source project participation
- You have achieved academic excellence
- You have a great collaborative nature and communication skills
- You love to use your strong analytical skills and critical thinking to aid in tackling challenging problems

QUALIFICATIONS:

- You are currently enrolled in a 4-year BA/BS program with a major in CS, EE, or Mathematics as an undergraduate in your Sophomore or Junior year
- Some proficiency in Ruby and Rails
- Experience with Git and GitHub

About GitHub Who we are GitHub is the best place to share code with friends, co-workers, classmates, and complete strangers. Over ten million people use GitHub to build amazing things together. With the collaborative features of GitHub.com, our desktop and mobile apps, and GitHub Enterprise, it has never been easier for individuals and teams to write better code, faster. We have a lot of exciting things to do, and we’re looking for the right people to grow with us! Why you should join our Summer 2016 Intern Program Working at GitHub is, to put it simply, a special slice of the universe. We’re committed to transparency, collaboration, experimentation, and always staying classy. We’ve built and are growing a place where we truly love working, and we think you will too. We love watching talented people learn and explore their skills. Our internships are designed to give you unique work experience by pairing you with real GitHubbers on real projects. As a Summer Intern: - You will be based at
our headquarters in San Francisco, CA - Your internship will be 8–12 weeks between May and September, 2016 - You must be a student enrolled in a university, community college, associate, or graduate school program to be eligible Email us at intern@github.com if you have any questions. GitHub is made up of people with many different backgrounds and lifestyles, and we like it that way. We invite applications from people of all stripes. We don’t discriminate against employees or applicants based on gender identity or expression, sexual orientation, race, religion, age, national origin, citizenship, pregnancy status, veteran status, or any other differences that people imagine to discriminate against one another. Also, if you have a disability, please let us know if there’s anything we can do to make the interview process better for you; we’re happy to accommodate.
