Web Developer Position Available

Salary: $65,000 - $80,000

We are Affinity Creative and we are looking to blow minds on the web, and we need a rockstar developer to do that.

We have an incredibly strong list of clients in the wine, spirits, and beverage industry where we have been working for over 30 years. We’ve always designed labels but beverage brands no longer just exist on the label and in the bottle, they exist digitally too. So we began looking out into the web landscape and realized it is a sea of sameness. Very little innovation, very little good design, and very little interaction is done within our industry apart from the huge brands (coke, pepsi, etc.). We want to change that.

We are building a young, fresh, extremely talented, passionate team of people to raise the bar across the industry and set the standard for the future. We are innovative. We are nimble. We are always challenging ourselves to get better.

Why not start your career making an immediate impact at a boutique agency instead of parsing code at a big firm?

Description: Be creative. Be Nice. Love what you do.

Qualified persons should be proficient (or willing to learn) in all web-related languages. (HTML 5, CSS 3, PHP, JavaScript, AJAX, Ruby on Rails, PHP, C++, MySQL, etc.)

We strongly believe that character makes a good teammate and work ethic is more important than skillset. The right candidates have a high standard of detail and an appreciation for good design.

Details: This position is full-time with an initial contract or freelance testing period. The job is also on-location because we believe face-to-face work is the best kind. We try to be as accommodating and flexible as possible so please reach out if you have any questions or just want to learn more!
