IT Analyst II

The Dublin San Ramon Services District, an award-winning local government agency providing water, wastewater, and recycled water to the Tri-Valley area is in search of a business database analyst (IT Analyst II), a SQL Server developer/administrator with some programming experience to evaluate, plan, test, implement, and support complex, agency-wide software projects including major system and application deployments and upgrades of commercial off-the-shelf (COTS) and in-house developed ASP.NET and C# software applications. This is a front-facing position requiring the ability to work well with employees at all levels of the organization, while also deep-diving into the technical programming opportunities and project management.

The ITS Division is a small, dynamic team of six consisting of a supervisor, systems’ administrator, network engineer, developer/mobile/web guru and technician delivering innovative IT solutions. Partnering with the District’s users, ITS provides anywhere/anytime secure access to a fully integrated and virtualized voice and data technology suite while maintaining a family/fitness/hobby/study/have-a-life-friendly work environment!

To be eligible, candidates must have a bachelor’s degree in a related field, and at least two years of hands-on work experience. The ideal candidate should be confident in their solutions; providing in-depth business requirements analysis; envision, evangelize, design, buy/build, test and implement solid software solutions to today and tomorrow’s needs, all while caring and feeding the District’s Microsoft SQL platform through strong DBA (SSAS, SSIS, SSRS, and T-SQL) experience.

The salary range for this position is $106,932 - $129,972 per year, with the starting salary typically set at the lower end of the range. The District's total compensation package also includes a CalPERS benefit formula of 2.7% @ 55 for classic members and 2% @ 62 for new members, generous health and welfare coverage, and paid time off.
