Participate in a research project focused on enabling autonomous systems to explain their behavior. Responsibilities will include contributing to the design of algorithms for explaining both symbolic and probabilistic reasoning, supporting implementation of those algorithms, and conducting experiments to evaluate functionality.

**REQUIREMENTS**

- Bachelor’s Degree in Computer Science.
- Completion of at least one year of graduate school in studies related to autonomous systems.
- Experience working on complex software systems.
- Familiarity with current techniques in the design of autonomous systems.

**About SRI:** SRI International, a research center headquartered in Menlo Park, California, creates world changing solutions to make people safer, healthier, and more productive.

**How to apply:** Apply via our web page: [www.sri.com/careers](http://www.sri.com/careers) to job number 1113BR.
