Aechelon Technology, Inc. is a leading producer of 3D simulator content, including geospecific visual/sensor databases and realistic 3D models. We seek people who share our passion for real time computer graphics and commitment to our mission of helping make our Nation’s pilots safer. We will give you a chance to work with some of the most talented people in the graphics industry.

**Position Description**

You will be a key part of Aechelon’s small, core manufacturing team performing several different responsibilities. The primary role of the position will be supporting the designing and production of our hardware platform, including graphics benchmarking, hardware maintenance, and storage validation for operation of Aechelon’s Image Generation products. Occasionally, as needed, you will also be in charge of shipping and receiving parcels. Finally you will be assisting the procurement and delivery of spares to our customers.

**Required skills and experience:**

- Competent computer skills including MS Office
- Experience in building PC-based server or workstation
- Familiarity with set-up and administration of current Microsoft Windows Operating Systems, Windows Server a plus
- Capable of script development and debugging
- Strong analytical and problem-solving skills
- United States Citizen or Resident
- Must be able to life 30 pounds
- Pursuing or have completed a BS in Engineering, Computer Science or similar technical degree

**Desired skills and experience:**

- PowerShell & VBScript knowledge
- Experience with networking, Multicast, SNMP, and other networking technologies
- Experience benchmarking hardware, networking, and storage products
- Experience with ticketing systems such as Bugzilla or Jira
- Experience with Configuration Management (CM) systems
