Job Type: Part-Time Programmer

Job Description: Develop an online, interactive platform for a naming therapy so that speech pathologists can use this interactive platform with their patients. Host this interactive platform on a webpage and maintain (or set up resources to maintain). Attend weekly meetings with researchers developing the interactive naming therapy platform.

Pay and time required: 200 programming hours at $15/hour

Knowledge, Skills, Requirements: Computer programming skills at the level needed to develop an interactive online website. Ability to follow instructions, tend to details, complete assignments in a timely manner, and contribute to website development discussions. The qualified candidate will also be self-motivated and responsible.
