Computer Science Newsletter Fall 2019 #3

Contents:

- ACM Computer Science Tutoring (updated schedule)
- GS1 US Trace-a-thon Hackathon SF
- Abigail Fischbach Scholarship for Women in Computing
- Sirius XM + Pandora Summer Internship
- Campus Safety Week: Cyber Security Awareness Session

Job Positions:

Bank of America Software Engineer

ACM CS Tutoring

Tutoring service is one of the great resources provided by the ACM Club under Computer Science Department which is available for students ranging from freshman to senior. One can get help with their assignments and side projects by utilizing the resource available to you. Tutors are well trained in their field, therefore, they can provide you with the most efficient algorithms to get you started with the project code. With that being said, they can also help you solve critical bugs and logical errors in your code. The tutoring service will take place in the undergraduate lab (SCI254, Door password: 987654), where you can also get great exposure to the Computer Science community.

Computer Science Tutoring: The ACM club is pleased to introduce **FREE** peer tutoring this semester! ACM tutor Mitul Savani is ready to help you in your projects. Please see below for the updated schedule.

Here is the breakdown of the hours and courses:

<table>
<thead>
<tr>
<th>Tutoring hours:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mon</strong></td>
</tr>
<tr>
<td>12:30 pm – 2:30 pm</td>
</tr>
</tbody>
</table>

Classes Offered:
CSC210, CSC211, CSC220, CSC340, CSC413.

Location:
Science Building, Room number 254
Door Password: 9-8-7-6-5-4

*Note*: Hours are subject to change

**GS1 US Trace-a-thon Hackathon SF**

**Website**: GS1 US Traceathon

**Info**: Join GS1 US in San Francisco and use disruptive technologies to create solutions to critical supply chain issues related to visibility and traceability.

**Date and time**: October 19th and 20th

**Location**: Broadway Studios

**Who can join**: Students 18 and older with skills in supply chain application development, Data Science, Artificial Intelligence, Machine Learning, Blockchain, and/or various coding languages such as JSON, XML and JavaScript. Other coding languages are fine as long as your students are interested in the challenge :) 

**Prizes**: $20k prize pool, the grand prize is $10k. Also a raffle prize of $1k for all qualifying solutions!

**Cost**: FREE

**Abigail Fischbach Scholarship for Women in Computing**

The Abigail Fischbach Scholarship is to provide funding to students active in supporting women in computing, in organizations such as Society of Women Engineers, SFSU CSC Lean in Circle, SFSU’s Promoting Inclusivity in Computing (PINC), or SFSU Women in Science and Engineering, pursuing undergraduate or graduate degrees (full-time) in Computer Science and Computer Engineering within the School of Engineering or Computer Science at SF State.

To apply please see this link with more information: [https://sfsu.academicworks.com/opportunities/9811](https://sfsu.academicworks.com/opportunities/9811)

**Deadline**: 10/20/2019

**Sirius XM + Pandora Summer Internship**

The Sirius XM + Pandora university recruiting team wants to personally invite you to our office on **October 7th** to learn about the Road Crew Summer 2020 Internship program! During the open house in our Oakland office you will hear directly from current Pandora employees and former interns who will share all about the complex projects, summer activities, and networking opportunities you will have during our 10-week program.
This event will be primarily focused on our software engineering and product-based internship. We will also be on the lookout for a few data scientists as well at the Ph.D. level. Our internships are geared for those pursuing bachelor's and master's degrees who are within two semesters of graduating or will be recent grads by summer 2020.

Space is limited so please RSVP using the link below and follow us on social, @lifeatpandora & @life@siriusxm to stay updated!

**Campus Safety Week: Cyber Security Awareness Session**
Cyber Security Awareness
3 pm – 4 pm, Library 121

*Presented by: Mary Morshed, Information Systems and Technology*

This year’s theme for cyber security awareness month is, “OWN IT.  SECURE IT.  PROTECT IT.” It’s important to understand your digital profile both at home and at work/school, what tools are available to secure it, and lastly what actions you can take to protect it. Join us to discuss easy-to-use techniques to improve your cyber hygiene, share cyber security cautionary tales, and receive pointers to on-line resources for tips and tricks to keep your devices and information safe.

**Job Openings:**

**Bank of America Software Engineer**
Bank of America (BofA), a Top U.S. Bank, is seeking energetic and highly motivated Computer Science/Related majors (graduating in Spring / Summer / Winter 2019-20) passionate about mobile application development for the role of Software Engineer to help it continue to deliver industry-leading, J. D. Power-certified mobile apps, from our San Francisco and Charlotte locations.

**Job Description:**
The Software Engineer (SE) will be responsible for design, development and coordination of code development activities on BofA Mobile Applications. A SE will be primarily responsible for delivering design and code during application development. While assigned to a project, the SE will represent the development team to the other support groups such as UI development, business sponsors, functional testing, technical/stress testing, and environment-support (such as production and certification).

For more information, please see attached flyer.
Please send your résumé to cd.vijay@bankofamerica.com (with a link to your public projects on github, etc., if you have one) for immediate consideration. Please, NO PHONE CALLS.
