Senior Data Architect at Quantified Skin

Quantified Skin has open positions for Senior Data Architects.

Data architects are responsible for the design, configuration and implementation of the following parts:

Web Server

RESTful API system

Backend software infrastructure

Databases

Parallel computing resources

Cloud computing interface

Your time at Quantified Skin will involve 80% client facing work and 20% R&D. We encourage team members to work on ML/DL related research.

Please provide detailed information below if interested. We usually respond within 24 hours. We request 2 references prior to joining the team, please have them ready.

Please feel free to email Jon Stenstrom: jon@quantifiedskin.com with your resume and any questions you may have
