

KLEINER PERKINS
Fellows

Kleiner Perkins Fellowships

About the Program

Over the course of a summer, KP Design and Engineering Fellows join our portfolio companies, where they develop their technical or design skills and are mentored by an executive within the company. Participants in our new Product Fellows program will get the chance to spend a full year working at a Silicon Valley startup.

Fellows will also be invited to attend both private events held by Kleiner Perkins as well as by our portfolio companies, where they can meet other talented engineering and design students, network with luminaries in their respective fields, and explore the San Francisco Bay Area. After the program, Fellows who have graduated and go on to found their own companies will have the opportunity to receive \$100,000 in seed funding from Kleiner Perkins to take their company to the next level.

About Kleiner Perkins

At Kleiner Perkins, we partner with the brightest entrepreneurs to turn disruptive ideas into world-changing businesses. We've helped build and accelerate growth at pioneering companies like Amazon, Google, Lending Club, Nest, Twitter, Uber, and Mandiant. Kleiner Perkins offers entrepreneurs years of operating experience, puts them at the center of an influential network, and accelerates their companies from success to significance.
