

# MISSION BIT

Mission Bit is calling on those with a passion for code and community empowerment to join our team and dedicate their skills and knowledge towards uplifting SF Bay Area students and closing the tech divide. Our instructors have the opportunity to work closely with high schoolers, the world's innovators of tomorrow, and share their enthusiasm for code, insightful career advice, and desire to help others. As an instructor, you will be at the forefront of designing creative lesson plans, and connecting with students to provide an engaging and welcoming classroom environment. We offer \$37.50 per hour.

## **Why teach with Mission Bit?**

We combine social justice and computer science education to empower minority students with knowledge to navigate an industry that has increasing prevalence in our day-to-day lives. We believe that every student should have access to a STEM education, confidence in their abilities, and enough support to guide them into the tech industry with ease.

## **What courses can you apply towards?**

Please see the following for a brief description, times, dates, and specific requirements for each course.

[Intro to Web Programming](#)

[Android Game Design 101](#)

[Career Prep](#)
