

Mobile Developer at Quantified Skin

Quantified Skin is looking for mobile developers for Android and iOS. This role gives you the ability to implement native image processing algorithms and recommendation engines on Android / iOS.

Your time at Quantified Skin will be spent as follows:

50% of the time will be spent on implementing algorithms.

50% of your time will be spent on collaborating with designers & systems engineers on usability testing of the mobile app.

Please provide detailed information below, if interested. We usually respond within 24 hours.

We request 2 references prior to starting with us, please have them ready.

Also, reach out to Jon Stenstrom at jon@quantifiedskin.com with your resume and any questions you may have.
